Dr. Joshua Lederberg
Department of Genetics, S331
Stanford University Medical Center
Stanford, California 94305

Dear Dr. Lederberg:

Please find enclosed my original letter to Dr. Feigenbaum and a discussion of the state of my UCLA dissertation work as of about the middle of August. I should point out that this discussion was originally intended as merely a working paper for the members of my committee and myself, but was included in my correspondence with Dr. Feigenbaum, and is now being passed on to you. It is therefore not a finished paper in any way, but I hope it can be of some use in the Hayes-Roth proposal.

Sincerely,

James R. Miller

JRM/dm
